Exam : **HP2-N53**

Title : Delta - HP LoadRunner 12.x
Software

Vendor : HP

Version : DEMO

NO.1 What is the purpose of the VuGen Tasks Pane?

- A. to allow Performance Testers to send messages to one another about script tasks and project goals
- B. to add, edit, and track tasks associated with an individual script or overall goals of the project
- C. to compare test results to specific goals and update the project status accordingly
- D. to add, edit, and remove bookmarks and breakpoints within a script

Answer: D

NO.2 The following improvements have been made to LoadRunner v12:

Enhanced replay summary with transaction breakdown with new time-trend charts

Support for editing common file types

Improved search capabilities

Ability to disable snapshots for better performance

To which component were these improvements made?

- A. VuGen
- B. MI Listener
- C. Controller
- D. Analysis

Answer: C

NO.3 How is the run logic in a TruClient script controlled?

- A. Run logic is not applicable to TruClient protocol, as TruClient scripts contain no actions.
- B. The TruClient Sidebar handles all the run logic for the TruClient script.
- C. In the same way as the Web (HTTP/HTML) protocol script, with Vuser_init, one or more action sections, and a Vuser_end.
- D. TruClient scripts contain one action only.

Answer: D

NO.4 HOTSPOT

The method of communication between a client and the server

▼

- Protocol
- Script footprint
- Transaction
- Virtual User or VUser
- Scenario
- VUser Script

The recorded actions of a business process performed in your application

▼

- Protocol
- Script footprint
- Transaction
- Virtual User or VUser
- Scenario
- VUser Script

Emulates the actions of human users working on your system

▼

- Protocol
- Script footprint
- Transaction
- Virtual User or VUser
- Scenario
- VUser Script

Defined by the quantities of the various resources that are required on a load generator in order to execute the VUser script; typical

▼

- Protocol
- Script footprint
- Transaction
- Virtual User or VUser
- Scenario
- VUser Script

Defines the events that occur during a testing session, based on performance requirements

▼

- Protocol
- Script footprint
- Transaction
- Virtual User or VUser
- Scenario
- VUser Script

You define it, to measure the performance of your system; it enables you to measure how long it takes to perform a set of steps

▼

- Protocol
- Script footprint
- Transaction
- Virtual User or VUser
- Scenario
- VUser Script
